

Smart Hub Mini

A step-by-step guide to installing and configuring your compact smart home control panel.

- Mains powered
- Touchscreen
- Voice Assistant Ready
- App setup needed

Contents

- Installing the HALO Smart Hub Mini
- Initial Setup (Boot Guide)
- Navigating the Interface
- Controlling Devices
- Scene Control (Tap-to-Run)
- Settings & Customisation
- Troubleshooting

1. Installing the HALO Smart Hub Mini

Professional Installation Recommended
Electrical installation involves mains power and should be carried out by a qualified professional.

- ### 1 Turn Off the Power

Locate your **consumer unit (fuse box)**. Turn off the mains circuit breaker that controls the installation area.
- ### 2 Prepare the Wall

Ensure the wall box is clean and securely fitted. If not pre-installed, fix the **mounting bracket** to the back box using the included screws.
- ### 3 Wiring

Use a voltage tester to ensure there is **no live current** before proceeding. Connect the wires as follows:

L **Live**
Brown wire

N **Neutral**
Blue wire

Double-check connections are firm and properly secured.
- ### 4 Mount the Panel

Align the Smart Hub with the wall bracket. Press the hub **firmly until it clicks into place**.
- ### 5 Restore Power

Return to the consumer unit and switch the power back on. The HALO Smart Hub Mini should power up automatically.

2. Initial Setup (Boot Guide)

- Power On & Language**

The screen will light up with a welcome message. Choose your preferred language (**English UK** recommended).

Connect to Wi-Fi

Tap **"Settings" > "Network"**. Select your **2.4GHz** home Wi-Fi network and enter your password carefully.

Pairing with App

Open the **VIVÖE app**. Tap **"+"**, select **"Scan"**, and scan the QR code shown on the panel screen.
- Complete Setup:** Wait a few seconds for the control panel to sync. Once linked, the Smart Hub Mini will automatically sync with your VIVÖE account, rooms, and any connected devices.

3. Navigating the Interface

Familiarise yourself with the Home Screen layout.

- Top Bar**

Shows time, date, local weather, and Wi-Fi signal.

Room Shortcuts

Tap to view devices grouped by room.

Scene Shortcuts

Tap to trigger your custom automations instantly.

Menu Icon

Access settings, pairing, themes, and system options.

Note: Room, scene, and tap-to-run shortcuts need to be programmed in the **VIVÖE app** and will automatically show on the panel.

4. Controlling Devices

- ACCESSING**
- Swipe right** from the home screen to access All Devices. Devices added via the app will automatically appear.
- CONTROLLING**
- Tap the **power icon** on a card to toggle it on/off.
 - Tap the **device card** itself to open the Advanced Control Page.
 - Tap **All Devices** (top left) to filter by room.
- CUSTOMISING**
- Long-press** a device card to reorder the display or hide devices (they can be restored later).

5. Scene Control (Tap-to-Run)

- ACCESSING**
- Swipe left** from the home screen to view your configured Tap-to-Run scenes.
- RUNNING**
- Tap a **scene card** to trigger a pre-set group of actions with a single touch (e.g., "Movie Time").
- OPTIONS**
- Tap **Tap-to-Run** (top left) to switch between lighting and other scenes.
 - Long-press** a scene to hide, reorder, or restore it.

6. Settings & Customisation

Swipe down from the top of the screen and select the gear symbol to access settings.

- Wi-Fi Network**

Change or reconnect to your network.

Display Brightness

Toggle between auto or manual brightness.

Theme

Choose dark mode, light mode, or a colourful layout.

Voice Assistant

Connect to Amazon Alexa or Google Assistant.

Firmware Update

Keep your device up to date for best performance.

7. Troubleshooting

Problem	Solution
Screen not powering on	Check mains connection and breaker. Ensure wiring is correct.
Cannot connect to Wi-Fi	Use 2.4GHz only . Check password and router proximity.
Device pairing fails	Reset the smart device and retry. Keep within 5 metres of the hub during pairing.
Scenes not running	Verify conditions and device connectivity. Check time zone settings.
